Planting & Care Instructions

Form: Bulb

Sun Exposure: Full Sun, Partial Shade

Height/Habit: 16-18"

Spread: 4-19"

Spacing: 4-19"

Planting Depth: Plant with 1 - 2" of soil above the bulbs.

Flowering Date: Mid – Late Summer

Hardy in Zones: 7-10. Elsewhere lift in the fall.

Winter Care: Bring outdoor pots indoors, or lift and store the tubers in a frost-free environment. Lift in zones 3-7 for fall.

Flower Color: Black

Flower Form: Tuberos blooms on long stems. Showy, hood-like spathe.

Foliage Type: Dark Green arrow shaped foliage with white spots

Pruning: remove spent flowers

Soil Requirement: Grows best in well-drained soil with good organic matter; prefers slightly acidic soil; avoid heavy clay with poor drainage. Check soil weekly for moisture. Water thoroughly when dry

Watering Requirement: Water thoroughly when dry.
